

CS 410 Software Engineering Software Development Project

Part 5: System Design

Tasks

- Decompose the system into subsystems
- Select the architectural style(s)
- Design the system architecture for your project
- Develop the Start-Up use cases, including
 - Use case diagram
 - Textual use case descriptions
- Develop the sequence diagrams based on the use cases above

Deliverables

- Submit a report that includes the following parts to Assignments Project Part 5 folder by 11:00PM 4/3/2023:
 - Description and diagram of system architecture
 - Descriptions and diagram and of the start-up use cases
- Embed diagrams into the report so that there is only one single document to submit.
- One submission per team
